Epicor-CCT

(Copy Company Tool)

Built on top of Epicor ERP, the RheinBrucke CCT moves configuration settings from one company to another, without manual intervention. It accelerates the configuration cloning process, reduces errors, and improves audit compliance by generating accurate reports.

Replicating a company's configuration in a new entity often demands the investment of considerable time and resources, and can also prove to be expensive with errors creeping in from manual processes. Configuring the same set up for Different companies or implementing the same configuration for different customers can therefore be a daunting task.

Addressing the challenges in Epicor configuration migration

The Epicor-CCT (Copy Company Tool) completes the entire task of configuration migration in an automated (hence error free) environment within few minutes. This unique tool is currently the only such solution available for the Epicor ERP platform.

The clone process can be performed either in the same instance or different instances, based on the configuration of the application server.
