Solution Architecture	Project Management	Application Consulting	Support Excellence
We ensure that the right solution is conceptualized	We ensure that the project is delivered on time with high quality standards	We ensure that the conceived solution is implemented well	We ensure best SLA based L1 support is provided

e-Fusion methodology - Execution Approach and Stages

As per to our redefined methodology an Epicor business transformation life cycle can be divided into 5 stages and 10 activity deliverables as represented below. All these activities fall under our guiding principle, the 4-Pillar architecture

Case Study

Implementation of Epicor 10 ERP in Oman Fiber Optic - Oman, a leading manufacturer of world class fibre cable products

About

Name: Oman Fiber Optic, Muscat, Oman

Headquarters: Rusayl Industrial Estate in Muscat, Oman

Industry: Oman Fiber Optic Co. S.A.O.G. (OFO) is a public listed company that commenced cable production in early 1999. OFO uses state of the art technology to draw fiber and manufacture world class fiber cable products.

Business Challenges

- Difficulties in Managing the Base fibre
- New product introductions
- Pattern changes to the existing product
- On–demand Production scheduling
- Raw materials Planning and handling
- Integrated view for Finance
- Migration of data from legacy applications
- Manual intervention impacting efficiency

RheinBrücke Solution

Implemented Epicor10 with Cable Production, Quality Assurance, Financial, Inventory, Purchasing and Sales modules

- Structured implementation compliant with statutory requirements.
- All Third Party Managed Operations in the areas of procurement and project execution managed through ERP.
- Business process harmonization done to simplify operations carried out under single ERP Platform.
- Use of Epicor std. Data Migration Tool and Templates to migrate data from Legacy system to Epicor ERP.
- Automated job order for daily production from the sales order
- Issuing multiple sub-assemblies, multiple material to inventory at the same time
- Generalized batch number with barcode generation for multi-level job operations.

Business Impact

- Reduced 'Accounts Receivables' Collection Cycle
- Real time integration of various business transactions. Better collaboration between departments by allowing information sharing.
- Centralized repository for Data. Real time access to ERP Data for analysis.
- Easier and customizable reporting using ERP Data.
- Realistic and faster estimation process to support business demand.
- Effective forecasts of Cash Flows for future planning.
- Elimination of manual reporting process and enabled faster month end closing activities / other cross functional processes.
- Improved Data Security and restricted access to sensitive data
- Created Interactive Business Dash Boards & graphical reports.
- Streamlined inventory management and production processes
- Timely books closure and accurate MIS reporting

Customer Speak

"Thank you for the continued good work on the ERP and Supply Chain project. I appreciate how you leverage the teaming with cross cultural teams with low cost geography for developmental resources while not compromising on the quality of deliverables to business…"

Massimiliano A. Milani
Director Europe & Africa at Federal Mogul, Antwerp, Belgium

"I had been using RheinBrücke team as my extended arm for some time now and I have really come to appreciate their depth of technical and functional knowledge of the product and their commitment to our end customers' needs. They react quickly to new challenges and are always there for me to rely on."

Craig Stephens
Vice President-International Consulting at Epicor Software, United Kingdom

"We have been working closely with RheinBrücke to roll out our Power-plant analytics solution. We were able to very quickly implement this solution that gives us holistic visibility of the plant performance."

Rajesh Zoldeo
Chief Commercial Officer, TPCIL & Sembcorp Gayatri Power Projects Ltd.
